OBJECTIVE

Full Stack web & software developer pursuing a B.S. in Computer Science. Certified developer through Rutgers University Coding Bootcamp. My passion for programming comes from my love of problem-solving and seeking deliverable solutions. Seeking an opportunity to work with a team I can learn from and help build great technology.

EDUCATION

Rutgers University Coding Bootcamp

New Brunswick, NJ

Computer Science & Web Development Certification

March 2021

- **GPA:** 4.0 | **Relevant Coursework:** HTML5/CSS3, JavaScript ES6, MERN stack (MongoDB, express, react, node), Java, SQL, AWS, Heroku, Python, GitHub

Rutgers University

New Brunswick, NJ

Bachelor of Sciences

Expected Graduation 2023

- **GPA:** 3.0 | **Relevant Coursework:** Intro Computer Science, Data Structures, Computer Architecture

SKILLS SUMMARY

Technical Skills: JavaScript, Node, React, MERN Stack, Java, C, SQL, HTML/CSS, Typescript, AWS, Heroku, GitHub, Firebase Auth, Websockets

PROJECTS

NerdHerrd | <https://github.com/nickkdb/NerdHerd> | <https://nerdherd-group5.herokuapp.com/>

- Site built on the MERN Stack that serves as a market for trading card collectors to collect, communicate, and trade cards. Features user profiles, on-site trading, and direct messaging between users.
- **Tools Used:** React.js, MongoDB, Node, Express, APIs, Firebase, WebSockets, Bootstrap

TripPlanner | <https://github.com/nickkdb/TripPlannerProject> | <https://nickkdb.github.io/TripPlannerProject/>

- Site providing flight quotes, weather data, and currency exchange based on user's desired destination and dates. Allows for one-way and round-trip searches and saving trips.
- **Tools used:** JavaScript, HTML, CSS, APIs, jQuery, Materialize

Snake the Game! | <https://github.com/nickkdb/SnakeJS> | <https://playsnakejs.herokuapp.com/>

- This project recreates the classic game Snake, where you eat more targets, the snake grows. This site features multiple difficulties via a speed slider, and displays a leaderboard of high scores.
- **Tools used:** JavaScript, Node, CSS, HTML, MongoDB, WebSockets
